Call Ron Pratt Electric for all of your electrical needs – start to finish

Residential

Ron Pratt Electric can meet all of your residential wiring needs. Whether you are planning a small renovation or large home or cottage, our team has the knowledge & experience to ensure that your project is handled in a professional manner. We are always up to date on the latest trends in lighting and energy efficient ideas. No job is too big or too small.

Commercial

Our team is familiar with all codes and requirements for commercial applications from stores to hotels to condominiums so you can be assured the job is done right, the first time.

Generac Generators

The unpredictable Muskoka weather causes more power outages than ever, and a standby generator is quickly becoming a must for home, cottage & business owners. We are proud to be a dealer for the dependable Generac Generator and have factory trained technicians to install and carry out any necessary warranty work. As well, we offer annual service contracts to keep your generator operating smoothly and to maintain your warranty. Don't have a generator yet? Ron is happy to visit your home or cottage and advise you on the proper size and provide a free quote!

Our Equipment

Our fleet of trucks allows us to visit sites all across Muskoka, quickly and efficiently. We also have an auger truck, boat, dump truck and mini-excavator so we can take care of all of your electrical installations.

Ron Pratt Electric Inc. offers full electrical service from installing hydro poles and bringing service into your new site to installing the cabling for your communications (phone/computer). Our staff of 15 electricians & apprentices have many years of experience to provide quality, guaranteed work. We can act on your behalf to complete your layout requests with your utility supplier and obtain permits. We have installed poles and services into the most demanding of Muskoka properties... including water access properties!

In most cases we can offer same day emergency service!
